### Salient Features

- Compact, sturdy & light weight.
- Specially partitioned terminals for withstanding high voltage.
- Front connections to all terminals & ease of termination of two wires of 1.5sq.mm for looping.
- Tubular contacts for greater contact reliability.
- Body material : Electrical Grade Phenol Formaldehyde
- Contact material : Phosphor Bronze - Tin plated
- Terminals : Brass-Tin plated with Copper base
- Rating : 10A, 250V AC
- Dielectric Strength : 2.5 KV for 1 Min.
- Insulation Resistance : 100M At 500V DC
- Ambient Temp. : +40°C to + 85°C

## About The Company

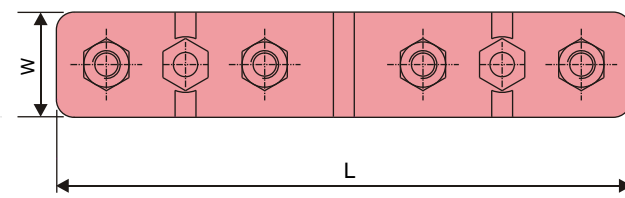

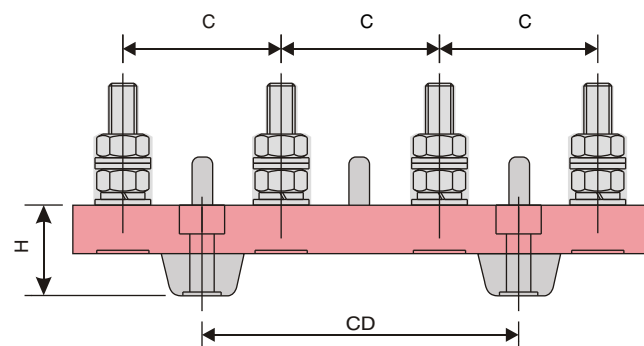

The Company acquired state of the art manufacturing facilities in the year 1990 and commenced manufacturing of components and mouldings for electrical and home appliances industries. The Company was known for its quality supply of custom built moulding in DMC, SMC & Bakelite for specialized applications. Gradually **SPECTRA ELECTRICALS PRIVATE LIMITED** upgraded its manufacturing activities in the field of low tension switchgear and control panel accessories. In a couple of years **SPECTRA** established its own identity in the electrical market with the expanded range of products to suit the needs of the market. **SPECTRA** has latest production facilities such as temperature and pressure controlled hydraulic presses for manufacturing moulded components. All products are designed using Computer Aided Design tools like AutoCAD. The moulds and components are made on precision machines to maintain the critical dimensions. All products are assembled on modern assembly lines with inbuilt stage inspections.

The busbar supports, fuse bases, relay / timer sockets and test terminal blocks, neutral links are few of the regular products of **SPECTRA ELECTRICALS PRIVATE LIMITED**. Apart these regular products, **SPECTRA** also manufactures custom made moulded components for specialized applications. The **SPECTRA'S** Busbar supports and Fuse bases are tested at ERDA, Baroda and ERTL, Mumbai. Special formulation of DMC and SMC are used in the products as per the requirement of the customer.

To ensure zero defect end products, the materials and finished products are tested with the help of our in-house test facilities for conformance and various quality assurance practices are implemented. These include inspection of incoming raw materials and components, stage inspection at defined check points at manufacturing and assembly stages and final inspection before packing.

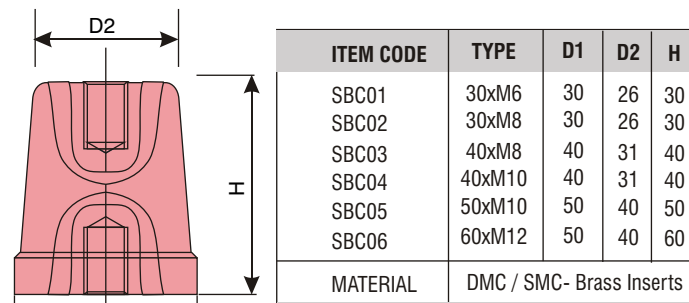

**SPECTRA** products are widely accepted by the electrical industry on its quality. Our endeavor is to satisfy customers needs and expectations and enable the Industry to source their entire requirement from **SPECTRA ELECTRICALS PRIVATE LIMITED**.
